JAIRO JIMÉNEZ

BACKEND DEVELOPER

Passatge Bellpuig 19, Sabadell, Barcelona | www.jairojimenez.dev | +34678002794

SUMMARY

A trained backend developer with +5 years of experience creating and optimizing APIs and robust web applications. Competent in Python, PHP and JavaScript, with practical experience in FastAPI, Laravel and management of databases such as PostgreSQL, MySQL or Informix in AWS environments. Experience in development with AI using multiple models and proven track record in developing scalable solutions for the real estate and pharmaceutical sectors.

SKILLS

Python	FastAPI	SOLID	LLMs
PHP	Laravel	Clean Arquitecture	MCPs
Javascript	SQL	AWS + Docker	A2A

EXPERIENCE

Backend Developer, Grup Fedefarma **Feb 2026 – Present**

- I implemented a new working method “AI oriented” to make the development easier for the team using AI tools
- I developed and maintained multiple projects relying on the responsible use of generative AI, structuring the appropriate technical context to accelerate the creation of secure and efficient code

Full-Stack Developer, Nester **Oct 2021 – Feb 2026**

- I designed and developed the main REST API, handling all authentication, middlewares and endpoints to serve multiple web applications
- I led architectural design, implementing a scalable and reliable system based on Domain-Driven Design (DDD) principles to ensure future growth
- I used AWS for cloud infrastructure management, leveraging S3 for document storage and EC2 for hosting and versioning Docker images

EDUCATION

Higher Technician in Web Application Development **Sept 2019 – Jun 2021**

Institut Jaume Viladoms · Sabadell

- Server-side and client-side software elements were developed
- Web applications for internet, intranet, and extranet environments were deployed, verified, and documented
- Relational databases were operated and managed
